It provides only a general overview and is not meant to cover all Swiss tax consequences relating to the purchase, holding, sale, and redemption of products. It does not take into account the specific situation of each investor. Tax laws and regulations, the interpretation thereof, and the practice of the Swiss tax authorities can change, at times with retroactive effect. This overview is based on the laws, regulations, and practices applied in Switzerland and in force at the beginning of the subscription period or the initial fixing date. The product may be subject to other foreign taxes, fees, and stamp duties, which shall be paid by the investor. Negative Interest	If, due to unusual market conditions, the interest component is negative, the interest income shall be deemed to be zero and no expense shall be incurred. The negative interest therefore does not constitute either debit interest, as defined in Article 33 of the Swiss Federal Direct Taxation Act (LIFD), or any other expense and is thus not tax deductible. It may not be offset by credit interest when calculating taxable income or any withholding tax.
